

SL-B26[®] BATTERY PACK AND BANK CHARGER

STREAMLIGHT[®]

**RECHARGEABLE
LIGHTING SYSTEMS**

TRANSFORM YOUR HIGH-PERFORMANCE LIGHTING TOOLS

INTO RECHARGEABLE SYSTEMS THAT OUTSHINE AND OUTPERFORM
FLASHLIGHTS WITH TRADITIONAL BATTERY PLATFORMS

AND SAVE MONEY IN THE PROCESS!

Streamlight offers a line of multi-fuel lighting tools that accept either CR123A lithium batteries or SL-B26® protected Li-Ion USB-C rechargeable battery packs. Choosing a rechargeable flashlight system nearly eliminates battery replacement and recycling costs, while dramatically decreasing downstream waste.

- Our “X” series of products provide the perfect blend of performance, durability and cost savings.

If you replace one pair of CR123A batteries each week for 52 weeks, that's 104 disposable batteries per year vs. a single SL-B26 rechargeable battery pack. If your organization has 100 lights in service, the SL-B26 rechargeable system could keep 10,400 batteries out of the waste stream and save your organization tens of thousands of dollars!

- Streamlight's proprietary SL-B26 battery packs feature an integrated safety circuit that protects from overcharge/overdischarge. They charge in approximately 5 hours or less and feature a charge status indicator.

- A variety of power sources can be used to charge this battery platform including USB power cords, charge cradle or bank charger, portable power pack or 12V DC automotive power.

- The rechargeable capabilities of the SL-B26 battery pack gives you an easy field replaceable battery system providing one to use and a fully recharged back-up.

SL-B26 battery packs in eight unit bank charger

Streamlight, the trusted brand for all of your professional and personal lighting needs
